(Default setting is on; suggest not to turn it off)

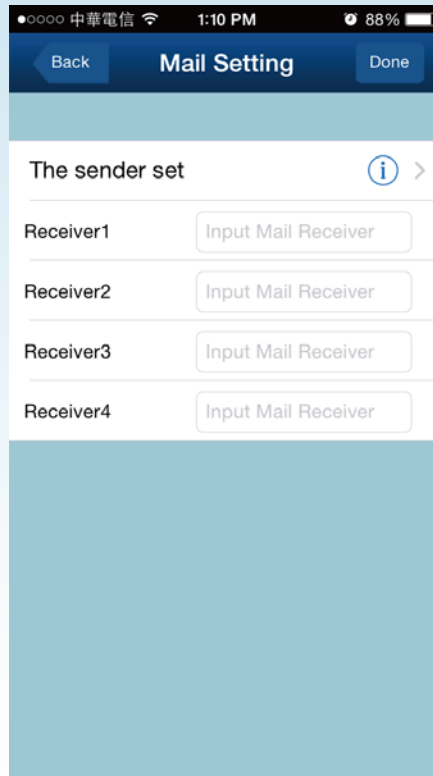

5.Mail Setting

- I. Tap to go to mail setting

Editing QEye setting

II. Key in receiver e-mail to receive alarm message (4 receivers at most)

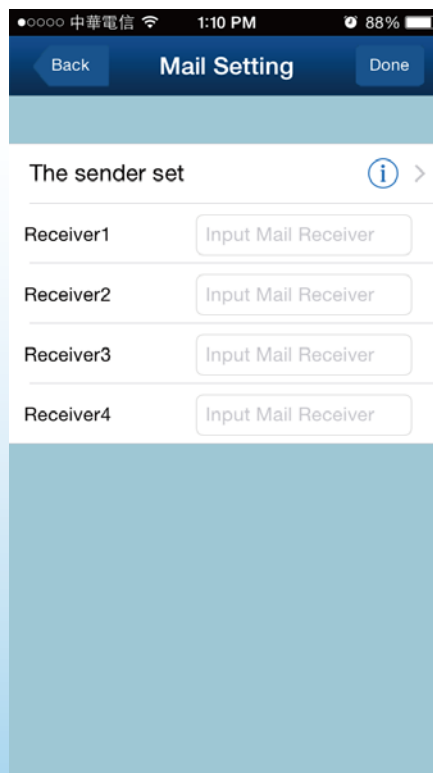

The screenshot shows the 'Mail Setting' screen with a status bar at the top displaying '中華電信', '1:10 PM', and '88%'. The screen has a blue header with 'Back' and 'Done' buttons. Below the header, there is a section titled 'The sender set' with an information icon. Under this section, there are four rows, each labeled 'Receiver1' through 'Receiver4' on the left and an 'Input Mail Receiver' text box on the right.

Alarm message will be sent automatically when food is empty or over shoots limit

III. Tap to see the sender information

* Suggest to use the default sender information

This screenshot is identical to the one above, showing the 'Mail Setting' screen with the 'The sender set' section and four receiver input fields. The information icon next to 'The sender set' is highlighted, indicating it should be tapped to view sender details.

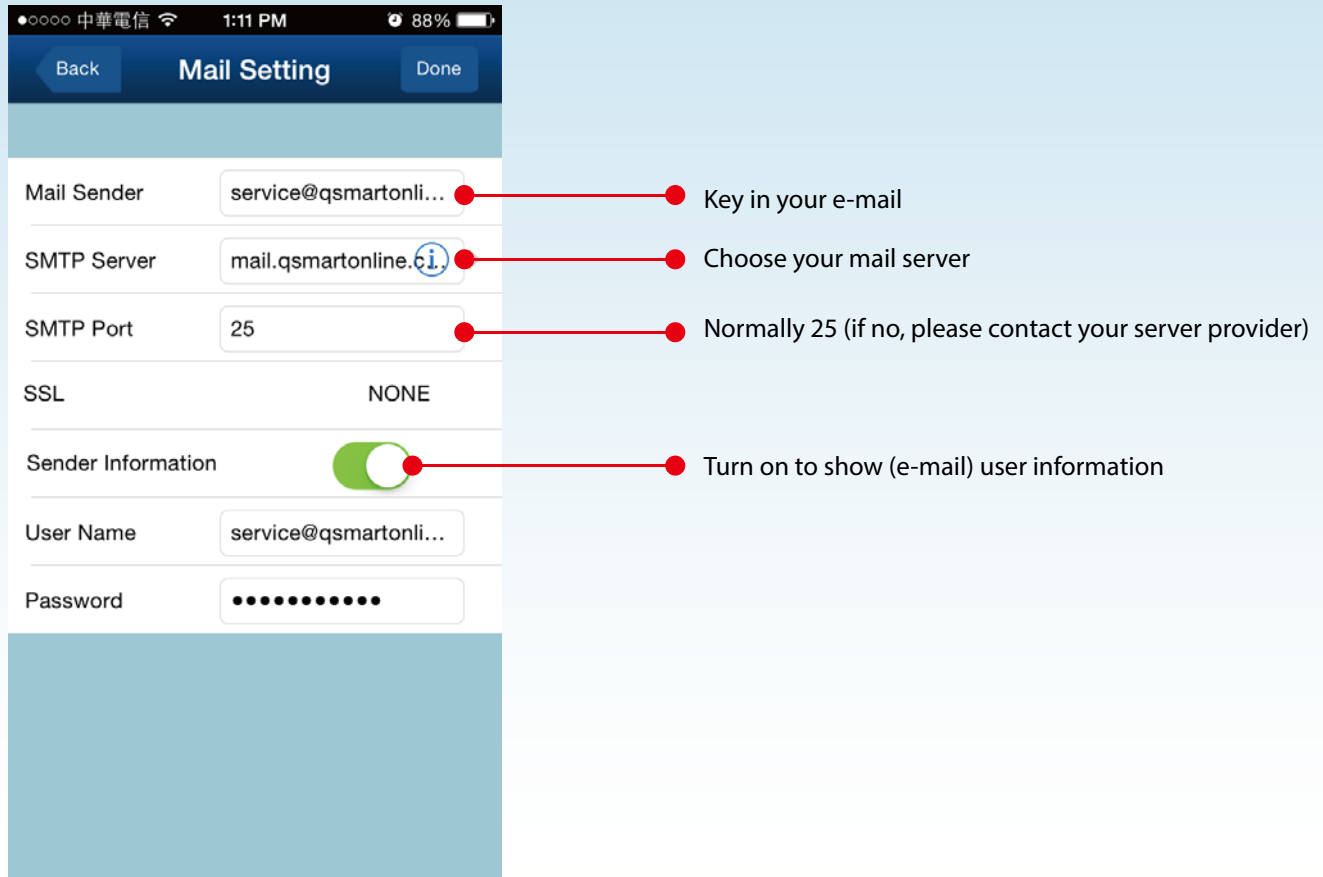

Default Sender Information

- Sender : service@qsmartonline.com
- SMTP Server : mail.qsmartonline.com
- SMTP Port : 25
- SSL : None
- User Name: service@qsmartonline.com

Editing QEye setting

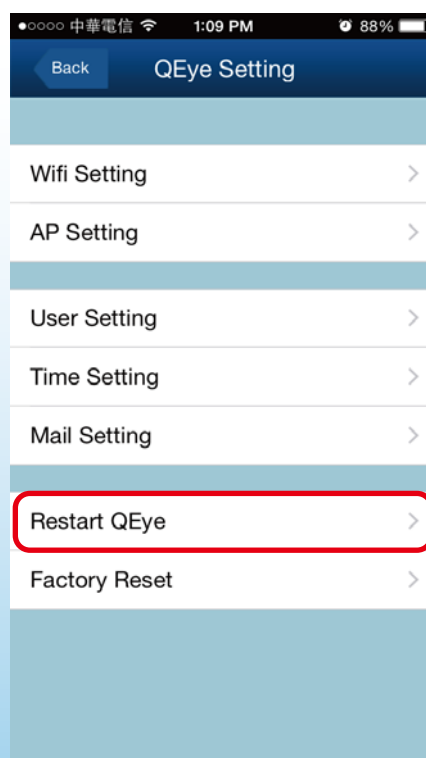

IV. Change sender information

* Strongly suggest "NOT" to change the sender information.
Once you change it, it no longer goes back to the default sender information
