Reset the director by holding the button down on the top of the unit, the status light will flash green, go solid red and then start flashing red. When the light starts flashing red release the button and wait for the unit to re-boot. During this the status light will go solid red then pulse slowly red and then return back to solid red. When this has happened the Director is ready to set up.

Tap on the settings on the I phone dashboard

Go in to the Wi-Fi tab to show the list of available networks and select the director

The network set up page for the director will automatically appear. Select the cancel button

Connect the lights to the Director in layout as normal. The lights may need to be put in discovery mode if they have been previously connected. Then set up the lighting schedule in Control

## irector-02002619.loc director-02002619 Log In Re-Scan WPS Use Without Inter Use Other Network Cancel

Choose to "Use Without Internet". Then come out of the settings page on the phone and open the My AI app.
