

You can now

# Feed your fish *and not your* algae

Guaranteed to absorb more phosphate than any other phosphate remover worldwide!

The professional way to control nuisance algae in freshwater & marine aquariums, ponds & lakes.

**Suitable for:**  
Tropical, freshwater and marine aquariums, ponds and lakes.

**Absorbs phosphate and silicate** without releasing back any of the absorbed materials.

**Used on Lake Plötzensee in Berlin** to eradicate algae effectively.

**It can be left indefinitely** in saltwater and freshwater aquariums with no ill effects and changed when exhausted.

**Can be used in new water** prior to addition to aquarium as it removes phosphates nearly instantly.

**Absorption capacity of Rowaphos: 25g of phosphate per Kg of media**

**ROWA® Carbon** – the essential material for absorbing toxins in your aquarium.
